

GLOBAL GOAL 11:

SUSTAINABLE TOWNS AND LOCAL COMMUNITIES

Global Goal 11 relates to the impact a company has on its local community.

11.a Supporting our local areas through local footprints

Give Steel thinks it is important to help make a difference in the towns where we are based.

We actively participate in partnerships with local and regional schools and educational institutions. Our partnership with High:five, who help people with previous criminal convictions to get into the labour market is another example of our local anchoring.

Our growth allows us to help strengthen our local communities at local level, by providing attractive jobs. This applies in both Brande and Aarhus as well as in countries where we have sales or engineering offices. By creating more jobs and maintaining production in Brande, we support Ikast-Brande as a local area for business.

Our sponsorship strategy is based on a desire to make a decisive difference in our local environment.

11.6 Reduced CO₂ per capita

Our optimised steel structures help to reduce the total per capita CO₂ footprint of the construction industry in the northern European export markets in which we operate. This creates communities that are more sustainable.

SUMMARY

- We leave a positive footprint in the towns where we are based.
- We have optimised our design structures to minimise total CO₂ footprint per capita.

UN SUSTAINABLE DEVELOPMENT GOAL 11: Sustainable cities and communities

11.6 By 2030, reduce the adverse per capita environmental impact of cities, including by paying special attention to air quality and municipal and other waste management

11.a Support positive economic, social and environmental links between urban, peri-urban and rural areas by strengthening national and regional development planning.
